Price List

TREATMENT AT WATERSTONE CLINIC

At Waterstone Clinic, our fertility treatments are backed by our many years of experience in Reproductive Medicine. We are known internationally for our pioneering fertility science, as we have led the way, the first to achieve most of Ireland's scientific milestones since we opened our first clinic.

Our goal at Waterstone Clinic is to bring dreams of parenthood to life. We deliver excellent success rates and exceptional care to our patients: we will be there for you every step of the way.

Our ethos at Waterstone Clinic is to make pricing simple and straightforward. We do not recommend unnecessary tests or treatments, and there are no hidden extras. That way, you will know precisely what is included in your treatment packages, and you can plan.

Our team is always happy to guide you through the costings and our payment policies.

All of our treatments include:

- Guidance from our patient liaison team
- Advice from our fertility nurse specialists via the patient portal and telephone
- Access to fertility counselling with our specialised counsellor
- Specialised early pregnancy scanning
- Advice from a specialised pharmacist

PAYMENT POLICY

Our payment policy at Waterstone Clinic is that payment for treatments and services is in advance, at the time of booking. Fertility treatment cannot proceed to baseline scan if payment is not complete. Storage payments must be made at regular, defined intervals.

CHANGES TO TREATMENT CYCLES

At times it is in your best interest to pause or change treatment after it has begun. If your treatment is changed to a less complex or more specialised procedure, the treatment cost will be reduced or increased respectively. If we need to discontinue your treatment, we will reduce the treatment cost to reflect the stage at which it stops and refund the balance to you. More details are available on our specific treatment price lists.

DETAILED PRICE LISTS

In addition to this general pricelist, we provide detailed price lists that are specific to your prescribed treatment that offer more information relevant to your treatment plan. Each price list elaborates on the treatment costs and details any additional considerations you may need to make as part of your treatment.

RECEIPTS

Our patient liaison team will upload each of your receipts to your patient portal. If you are paying a monthly charge for storage, the receipts will be sent to you via the payment processing provider.

You can use your receipts to claim certain expenses on private health insurance, please check with your provider as to your coverage. You can also claim tax relief via the MED1 form as part of the government tax relief for medical expenses scheme.
